Policy -III

POLICY FOR DETERMINING OVERALL ATTAINMENT AND TARGET SETTING FOR PO/PSO

PURPOSE:

1. To define an articulation matrix for a given academic year.
2. To derive the target level of overall PO/PSO attainment level.

PROCESS:-

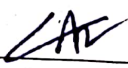

1. Direct attainment level of a PO & PSO is determined by taking average across all courses addressing that PO and/or PSO.
2. Indirect attainment level of PO & PSO is determined based on graduate exit surveys, employer surveys, and alumni surveys.
3. It is decided that Overall attainment level of PO and PSO will be measured through direct and indirect assessment where 80% weightage will be given to direct attainment and 20% weightage will be given to indirect assessment.

PO / PSO	WEIGHTAGE	
	DIRECT ASSESSMENT	INDIRECT ASSESSMENT
PO1 to PO12	80%	20%
PSO1 to PSO2	80%	20%

4. The target level of overall PO/PSO attainment level is defined using the average of articulation matrices derived from Overall CO-PO mapping matrix for respective PO/PSO.
5. For the first academic year of extension, consider 80% of average of articulation matrix for respective PO/PSO. The percentage parameter defined will vary depending on attained value of corresponding PO/PSO for each subsequent year to show the improvement in attainment level.
