

Outcomes: Session-3

- Participants got a brief idea about the simulation using UNISIM and ASPEN PLUS, its pros and cons with the history of this software.
- Participants got a chance to interact with the expert about the optimum design considerations.
- Participants were made aware of the current updated version and its modification in UNISIM.
- This session was interesting and informative as per the responses received from the attendees.

Words from the Expert

- “Process Engineering must develop skills in selecting thermodynamics method for simulation of any process equipment.” – Shri Ronak Soni

Glimpses of the Session-3 on “Simulation of Distillation Column”
